DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the customized routing service platform must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1 – 11 and 17 – 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Specifically, “a customized routing service platform” is not described in the specification.

Claims 1—11 and 17 – 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, it is not understood as to the difference between the CMR, the CMR database, the database server and customized routing service platform as claimed in claims 1 and 17.

In addition, “the platform” as claimed in claims 1 and 17 does not have proper antecedent basis.

Additionally, it is not understood as to which “platform” applicant intends. For example, note paragraph 0113 of the instant application. Described here is a “processing platform”.

Further, in claims 1 and 17, “a network switch” is claimed. Which network switch (since there are many) is applicant referring.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 – 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application Number 2007/0071215 (Cope) in view of U.S. Patent No. 6,574,661 (Delano et al.).

With respect to claims 12 – 15, note the Figs. 2 and 3 of Cope. What cope does not disclose is receiving instructions from a customer via a packet network. However, note that Delano et al. show that such is old in the art (see Col. 3, lines 50 – 64 of Delano et al.). It would have been obvious to one of ordinary skill in the art to have incorporated such receiving instructions from a customer via a packet network as disclosed by Delano et al. into the cope et al. system as an obvious convenience to customers.

With respect to claim 16, such a limitation is only duplicative to what is already shown in the art.
